

# Artem Sopilniak

## Fullstack developer

### Summary

Hello my name is Artem Sopilniak I have completed the training on fullstack developer. I have several team and individual projects that I have created using such technologies as html, css, javascript, react, redux and node as well as using several libraries that I used to solve problems. During the course I also learned some soft skills such as problem solving, teamwork, finding and using resources that will help me solve the problem. Now thanks to my experience and skills I can make projects qualitatively, fine-tune code and fix bugs almost any.
